Operating Systems
Web Development

Work Experience/Projects

JUN 2023	**Stree Vendors**	**Project**

A local commerce platform connecting women-owned small businesses with shoppers in their community.User-friendly interface designed with React.js and Tailwind CSS with secure authentication using Appwrite services.

APR 2023	**Project Rose**	**Project**

Building the official website for the institute's SAC (Student Activity Centre) using Next JS and Tailwind CSS with a team of around 10+ members.

APR 2023	**Medicamp**	**Project**

A website using React JS and Tailwind CSS was designed for booking doctor appointments according to symptoms and track clinic schedules to save users time instead of waiting.

MAR 2023	**API-store**	**Project**

Built a website that shows a list of APIs so that you can use the API for a fun project; this project has search functionality and filters. This is built using ReactJs, Tailwind CSS and Publicapis API.

MAR 2023	**Weather App**	**Project**

Built a weather app with React JS and Tailwind CSS using OpenWeatherMap API.Empowered users with real-time updates and a captivating interface.

Achievements

MAY 2023	**Postman API Fundamentals Student Expert**	**Link**

Extra Curricular Activities

2022-NOW	**Student Mentor**	**ICS**

Helping juniors bridge the gap between academic and personal life through comprehensive sessions, tailored materials, and expert guidance.

2022-JAN	**Technical Team Co-ordinator**	**Cosmopolitan**

I have been part of the technical team of COSMOPOLITAN, the multi-ethnic fest of the institute, where we build the event website using the MERN stack.

2022-JAN	**Organizer**	**HackNITR Hackathon**

Led and worked with 40 organisers to successfully conduct HackNITR, the largest student-run Hackathon with over 5000 registrations.

APR 2022	**Content Writer**	**Nitrusav**

I have been part of the content team of Nitrusav, the cultural fest of my institute, where I drafted sponsorship emails and contributed to arranging as many sponsors as possible.
